DETAILED ACTION

Response

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mura (WO 03/065699) in view of Walance et al (5,832,058).

Consider claims 1, 7 and 13, Mura teaches a circuit and method for providing test and/or monitoring access to at least two telecommunication lines (see abstract) comprising at least one bus and at least two primary branches extending therefrom (page 10 lines 5-15), at least one of the primary branches being provided with at least one switch which in a first state connects the primary branch with the bus (see Fig. 5 and page 11 line 15 - page 12 lines 9).

Mura disclosed that 2 and 3 are connected to grounded (Fig. 5 and 6). Mura did not suggest connect the primary branch with ground in a second state. However, Walance et al disclosed a test interface adapter having such configuration (col. 4 line 56 - col. 5 line 6; col. 6 lines 44-54). Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to incorporate the teaching of Walance et al into view of Mura in order to invoke various test states.

Consider claims 2 and 8, Mura teaches the claimed features (page 11 lines 18-29).

Consider claim 3, Mura teaches the claimed features (page 10 lines 5-19).

Art Unit: 2614

Consider claim 4, Mura teaches the claimed feature (page 11 lines 19-22).

Consider claims 5 and 9, Mura teaches the claimed feature (abstract, page 11 line 18-20).

Consider claims 6 and 14, Mura teaches the claimed feature (page 8 lines 18-28).

Consider claims 10-12, Mura teaches the claimed features (page 8 lines 18-28).

Response to Arguments

3. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
